RESOLUTION 2015-1

Agenda Item

TO: Mayor and City Council

FROM: Mark S. Gaugh, City Manager

DATE: February 2, 2015

RE: Water Plant North Primary Basin Launders Resolution

Issues

The launders that collect the treated water in the North Primary basin have been a repeated cause of problems, due to rusting. The launders are in a very corrosive environment and need repeated welding to keep them from collapsing into the basin. Newer basin construction uses launders made of stainless steel. This eliminates the rusting and risk of losing the basin capacity for water treatment.

We are proposing to replace the steel launders with stainless steel. This will increase the life and reliability of the launder system. Bids were requested from construction companies that perform water treatment plant construction.

Recommendation

Staff recommends that the Council approve Ross Construction to replace the launders at the bid price of $189,840. Funds were budgeted in the amount of $179,166, but the price of steel has increased since the estimate was put in the budget. The overage should not negatively affect the fund.
