RE: **Airspace and Access Easements – Cameron Memorial Airport**

BACKGROUND

The acceptance of the attached easements is more of a staff policy, rather than a requirement for a formal acceptance of easements. There are a total of three different easements associated with this portion of our overall Airport Layout Plan involving the Automated Weather Observation System. The AWOS is used for the purpose of gathering and transmitting weather conditions at the Cameron Memorial Airport as required by the Federal Aviation Administration and MoDOT Aviation.

The three easements are identified on our ALP as Tract U8- Curtis Easement; Tract U9- Fridley; and Tract U10 – Groebe.

The Council has already approved the Airport Layout Plan, the project, acceptance of grant monies for the cost of the easements, and the project itself. Additionally, the easements have already been finalized and recorded last fiscal year.

RECOMMENDATION

Staff recommends approving the three individual airspace and access easements as one project in one reading.
