Re: Manager's Report

Street Projects- Contractors have mobilized for the Lathrop area project and the pedestrian access project, as well. Recent rains have caused some severe erosion areas along the pump house road for Eagle Lake. Other culvert/ditch washouts have occurred in the city, as well. We will address those areas as we are able.

Old School Committee – We met with some of the Old School committee and we discussed the parking lot issue. For now, we gave them a list of potential parking lot contractors to see if some basic repairs can be made that won't be too costly.

Drainage Channel Behind of Kemper Motors – Update- We have offered to Mr. Kemper that the City will slope the ditch to a 3:1 slope and provide a grass cover that can be mowed easily. At Mr. Kemper's option, he can purchase rip-rap for the length of his property and the City will pay for the sloping and installation of the material, since the cost to the City will be about the same, either way.

Animal Shelter Status Update – Discussion item on agenda.

Mural Project – The prep work for this project has begun.
