Re: Manager's Report

July Council Meeting – Decide whether a Council meeting is necessary, and if so, propose July 5. Right now, it appears that we can skip the first meeting in July.

Street Projects – The Lathrop project is continuing, with several streets under construction at this time. The contractor is installing storm pipe, sidewalk, curb and gutters. Gas line relocates will need to be done, but we think MGE will be able to complete those before too long.

Third St. – The first part of the work on E. Third consisted of a chip and seal. The second part will be a micro seal. The public works crew did a really good job on short notice, cleaning the vegetation from the curbs, filling small holes with cold mix and smoothing the surface where they could. The micro seal will be smoother than the chip seal and will hopefully extend the life of the pavement several years. The public works crew is working to improve the drainage near Mulberry.

Animal Shelter Status Update – The Council was advised of the most recent options for the shelter and Tim Hamilton covered the repairs needed, should the Council decide to remodel the facility.
