From: Zachary Johnson, Interim City Manager

Date: December 17, 2018

Re: Manager's Report

Missouri General Assembly – The City is preparing for what could be an interesting session. Missouri's House of Representatives is experiencing one of the largest turnovers among House chambers in the country, mainly due to term limits. There are 59 (or 36%) new faces in the House and 9 (or 26%) new faces in the Senate. This requires us to lean heavily on our legislative teams within our various membership organizations. A few of the potential issues we are prepared to face are in regards to net metering, Sunshine Law requests, and Out of Boundary utility rates.

FY 2018 Audit – Hochschild and Bloom were here last week conducting our fiscal year 2018 audit. Since their field work is completed, we will continue to have correspondence with them until the final audit is ready to be presented in mid to late February.

US36 CID Meeting – Staff coordinated a meeting for the US36 CID. We had 4 of the 5 board members in attendance. During the workshop, the organization outlined the steps for the upcoming year to get the district operational.

DNR Inspection – DNR inspectors were on site on Thursday to conduct an inspection of our water treatment plant and distribution system.

Rain for Rent – Crews from Rain for Rent have been here picking up our emergency pipeline. All of our ring lock pipe has been picked up and returned to storage. They are now working on their HDPE pipe.
