DATE: May 21, 2012

RE: Boards and Committees

Issues

At the last Council meeting, discussion continued on modifying the Council Public Works Committee to include all five Council members, since we have upcoming major improvements on Eighth Street and storm water improvements on Walnut St. These are the projects we have under contract for design at this point, and others will be added as funds allow. All members agreed, so the Public Works Committee will consist of all five Council members. The remaining four committees have been previously assigned with two members to serve on each committee.

However, we do not have Council representatives assigned for MO-KAN, Region D Solid Waste Representative and the Tax Increment Financing (TIF) Commission. We will not have a member for the Kansas City Area Development Council this year, since the KCADC rotates their municipal board representatives throughout their membership group area.

Recommendation

It is recommended that the Public Works Committee consist of all five Council members and Council consider making appointments for the remaining boards.
